-_(ツ)_/-

merged commit **b5acb4d** into [REDACTED] on 9 Jul 2015

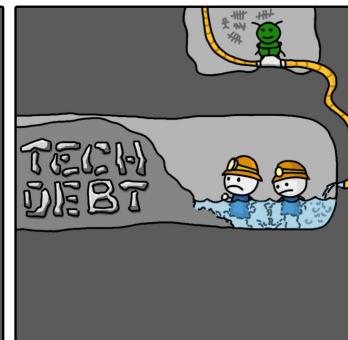

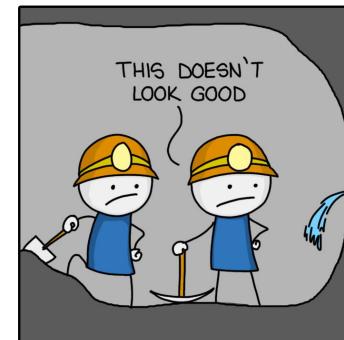

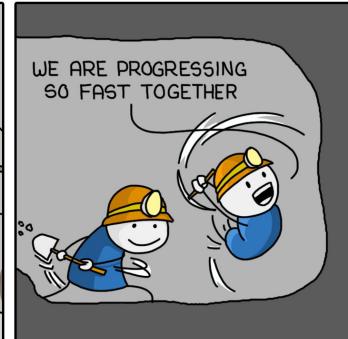

Le départ “Back-end team”

✓ Éviter les erreurs en prod

✓ Éviter la dette technique

TECH DEBT

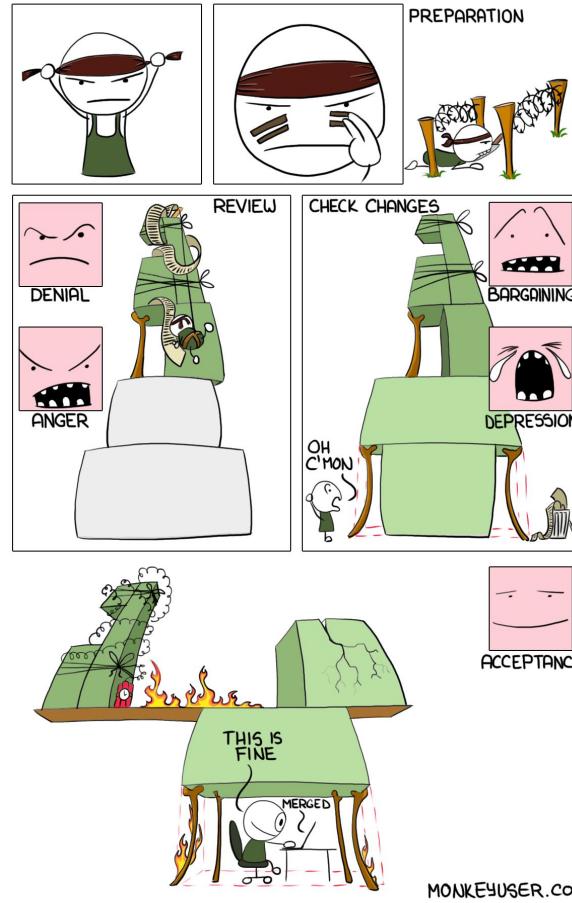

MONKEYUSER.COM

✗ On n'est pas toujours d'accord

CODE REVIEW STAGES

✗ On finit par
laisser tomber et
“blind approve”

La boîte grossit
“Epic team”

✓ Garder à
l'esprit l'état
global du projet

✓ Partager et apprendre

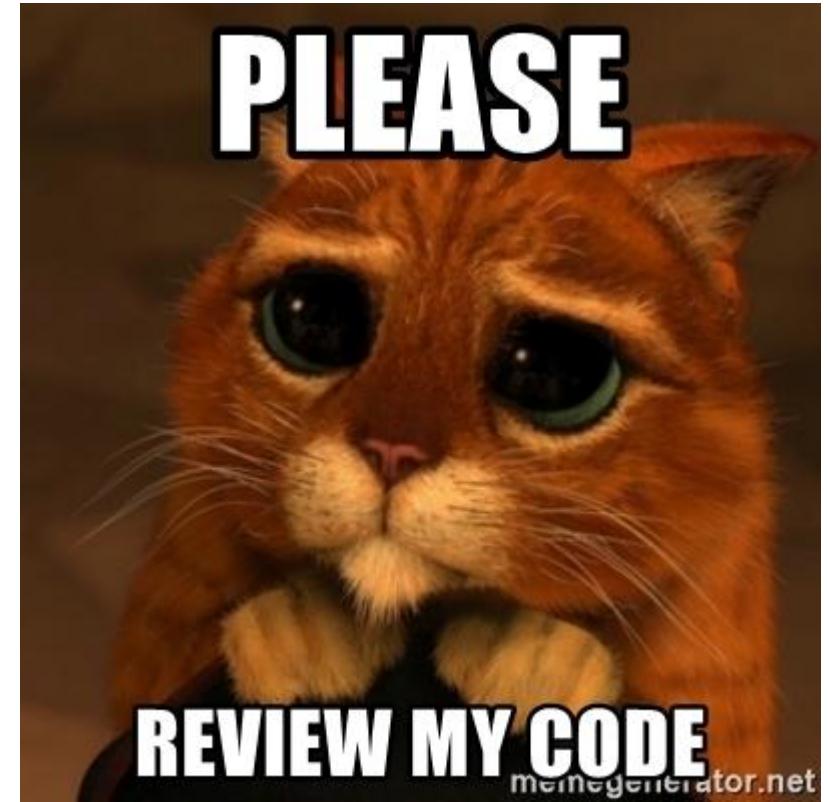

✓ Renforcer l'esprit d'équipe

X Chronophage pour le reviewer

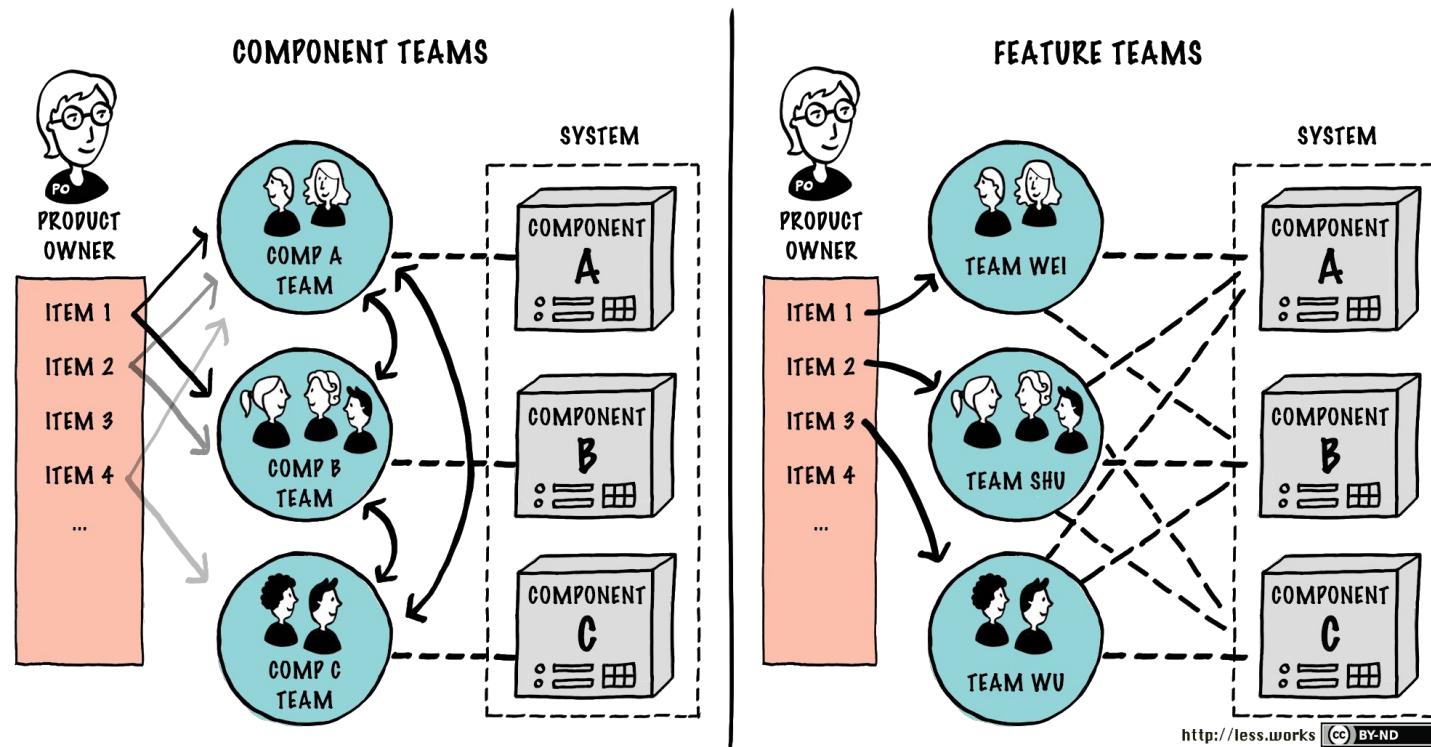

✗ Bloque le
déploiement
en production !

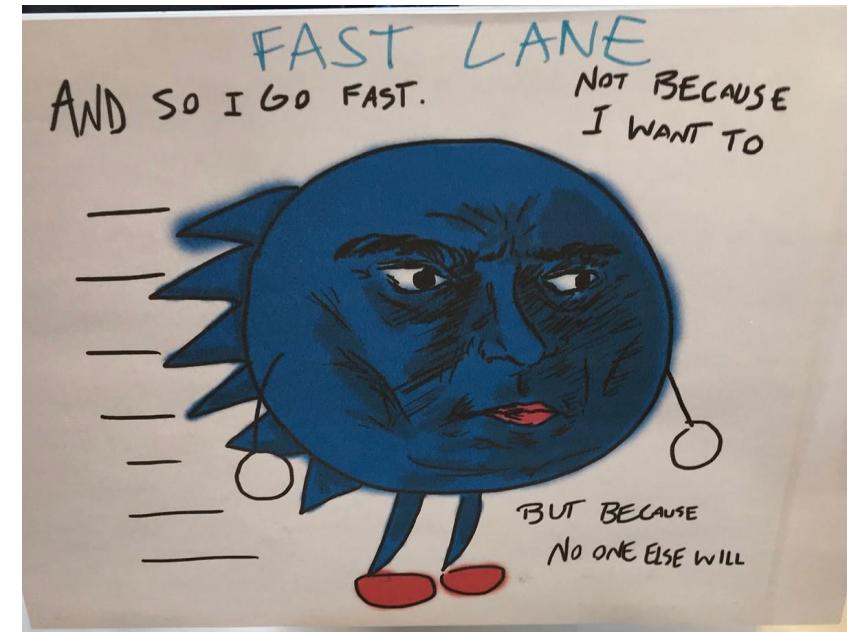

Réorganisation “Feature team”

Feature teams

Working lanes

Fast lane
Tech lane
Strategic lane

Organisateur des reviews

Alors comment
on s'y prend ?

On est une équipe

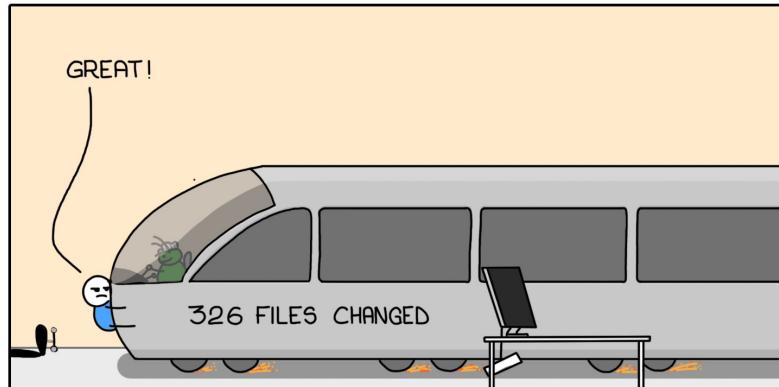

“Reviewer”
ET
“Committer”
doivent y mettre
du leur

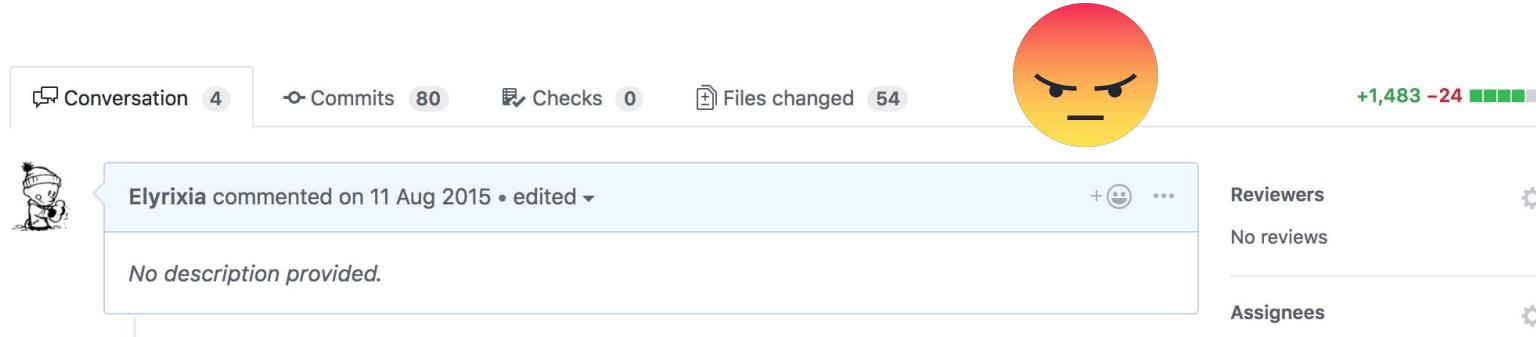

Bonnes
pratiques en tant
que “committer”

PULL REQUEST

MONKEYUSER.COM

Séparer le code en plusieurs sous-parties

A screenshot of a GitHub pull request page. At the top right, there is a large red and yellow gradient emoji with a grumpy expression. Below it, the pull request summary shows 4 conversations, 80 commits, 0 checks, and 54 files changed. The total change count is +1,483 -24. To the right of the emoji, there are sections for 'Reviewers' (No reviews) and 'Assignees'.

No description provided.

Reviewers

No reviews

Assignees

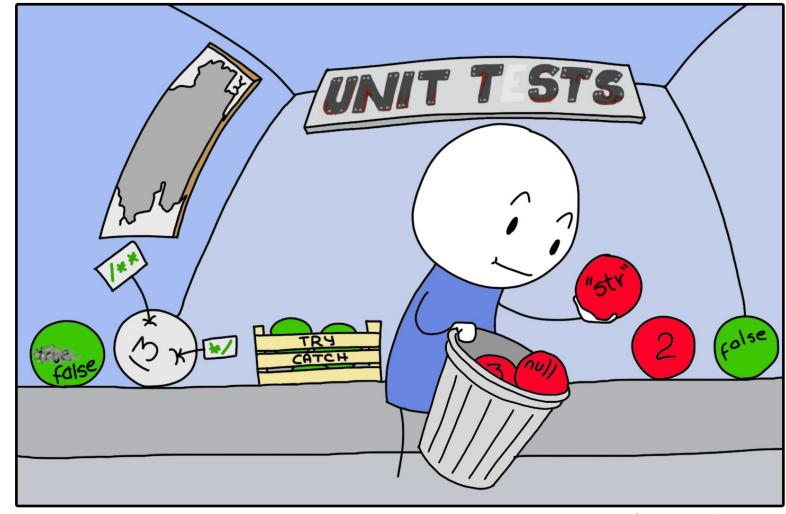

Description claire de la tâche et des changements apportés

“Review” son propre code

Tests clairs, utiles et proprement implémentés

FIXING UNIT TESTS

Restez
ouvert d'esprit

Comment être
efficace lors
d'une "review" ?

Se réserver un créneau

**Maximum
60 minutes**

~~Performance~~

~~Formatage~~

Vérifier le métier en priorité

~~Syntaxe~~

~~Implémentation~~

Vérifier la présence de tests et guider le développeur si nécessaire

Hello, you need to write an IT to confirm that the value will be forwarded properly inside the JSON.

See this link on how to check a settings from the JSON

And this link on how to create simple fixtures with portfolioitem

We can do pair-programming on this if you want

Commentaires utiles et détaillés

127 + def connectionId: Option[Connection.Id] = value match {

??

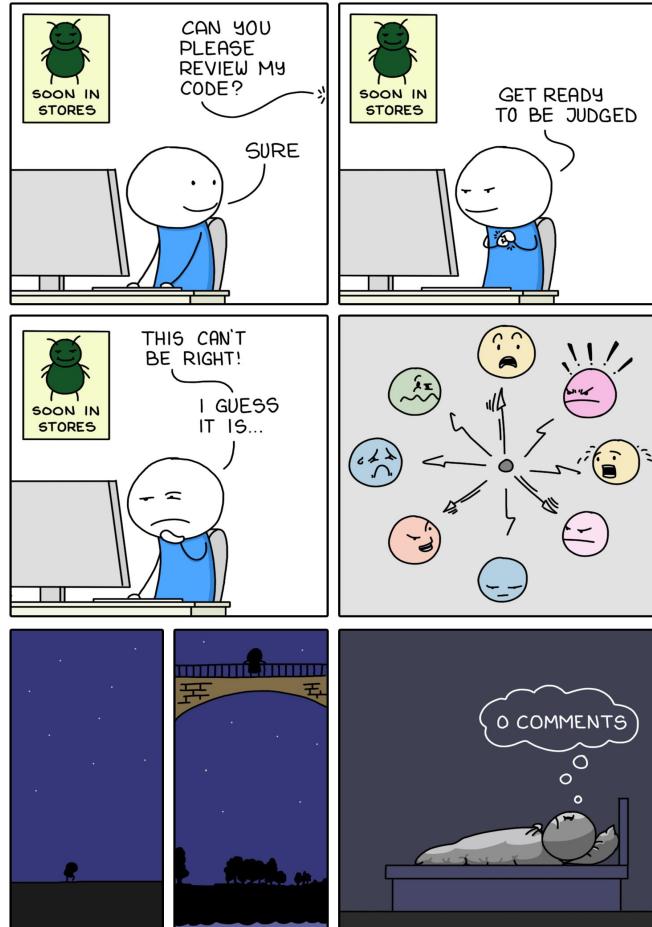

HOW TO MAKE A GOOD CODE REVIEW

Rester positif et respectueux

Éviter tout blocage

CODE REVIEW

Prendre en main
l'organisation

Guider les
nouveaux arrivants
sur le projet

Être proactif

Priorités

Urgences

Besoins
externes

Profiter des outils automatiques

Tests automation, Linter, Formateur de code, Trigger/Hook

Ré responsabiliser toute l'équipe

WE NEED
YOU TO REVIEW

A dynamic photograph of a surfer riding a massive, curling blue wave. The surfer, wearing a red wetsuit, is positioned on a bright yellow surfboard, performing a sharp turn that generates a spray of white water. The wave's face is a deep teal, while its base and spray are white. The background consists of more of the ocean and sky.

Les reviews doivent
devenir une évidence

Merci !
